

# Analyzer Probes

## NEX-PRB-MBDMAX

For Nexus Memory Compliance Analyzer Series Instruments

- High Speed/High Impedance Connection to Nexus MCA Instrument or Tek TLA
- Connect a DMAX/Common Footprint to the MCA or TLA
- Quick and Easy Setup

The NEX-PRB-MBDMAX probe is a high speed analyzer probe designed to provide a quick connection to DMAX/Common footprint designs.

### Typical Applications

These probes are designed for applications including:

- Connect to existing target or in house interposer
- Connect to Nexus interposer designs that are made with a DMAX/Common Footprint

### Analyzer Probes

These probes provide a connectorless, interface to a target or interposer.

Nomenclature	Instrument Supported	Notes
NEX-PRB-MBDMAX	MCA4000/5000 or TLA	High Impedance Midbus Probe

Contact Nexus if a shroud is required for your application.
